My dear Ray, I have been very interested in all that you have been doing since you got in the army. Besides seeing quite a bit of the US you have also found out what army life is like and how now you are probably flying every day. I was a little disappointed that you didn't get a chance to have a year or so of college training before going into flight training but since I didn't work out that way I suppose you are quite happy. It sort of made my job harder because I have wanted to get the war over before you could fly a combat mission. I haven't changed my mind even tho you will probably get your wings sooner than I had expected.

Ray, I hope you won't be too disappointed if something should keep you from getting your wings as a pilot. You must remember that there are other jobs in the Air Corps just as important as flying the ship. The pilots job might be the most interesting but think of what a sorry outfit the Air Corps would be if they had no navigators or ground crews, etc.

I have enjoyed all your letters recently. You have kept me mighty well informed. Wish I could tell you as much about myself, but there is nothing for me to tell. You probably know more of what is going on over here than we do. We read life to find out what is going on all around us. I think about you quite a bit and wish I could drop in on you for a visit. I know you must have enjoyed but
